Why Choose Vape & Go?

Versatile Payment System

By accepting both cash and multiple card payment options, VG-1 makes buying e-cigarette products simple. The machine can be configured to used either or all of the following functions:

Card Payment

The VG-1 is compatible with Visa, MasterCard, ApplePay and SamsungPay for quick and easy transactions. The payment terminal supports contactless, swipe and insert card payment letting the customer choose their preferred payment method.

Contactless Payment

The "Nayax VPOS Touch" system allows for swift contactless payments that save customers time. As each transaction takes less time, contactless payments help increase sales by eliminating queues.

Cash Payment

The "IT BV20" bank note acceptor can be programmed to multiple currencies. It only accepts exact amounts to eliminate the need to stock change. The "no change" feature helps simplify the operation and keep the design sleek, modern and minimalistic.

Simple & Stress-Free Operation

Multiple Languages

The customer can easily select their preferred language for a stress free user experience. Never miss out on sales to tourists seeking an easy buying experience in their native language.

Inventory Stock

up to 10 different products and 10-15 of each selection (depending on the size of the product). You get the option to stock vapes, e-cigarettes, accessories and other related products. The stock notification system helps minimize the machines downtime and increase revenue.

Ease of Use

The touch screen product and payment selection is designed for a quick and simple purchase process taking less than 15 seconds to complete. The customer can intuitively select the product and payment method they want by tapping the touch screen. *To watch the entire purchase process in action please request a copy of the Introduction video for the VG-1.

Remote Management

The VG-1 can be managed remotely from anywhere in the world with just a web browser. You get full control over you machine, even when not physically near your store. The advanced remote service desktop offers a wide range of remote management functions at your fingertips.

Modern Design Fitting Any Location

Compact Design

The wall-mountable VG-1 features a compact and sleek design with a large, easy-to-read touch screen display for a modern vending machine experience.

High Fidelity Display

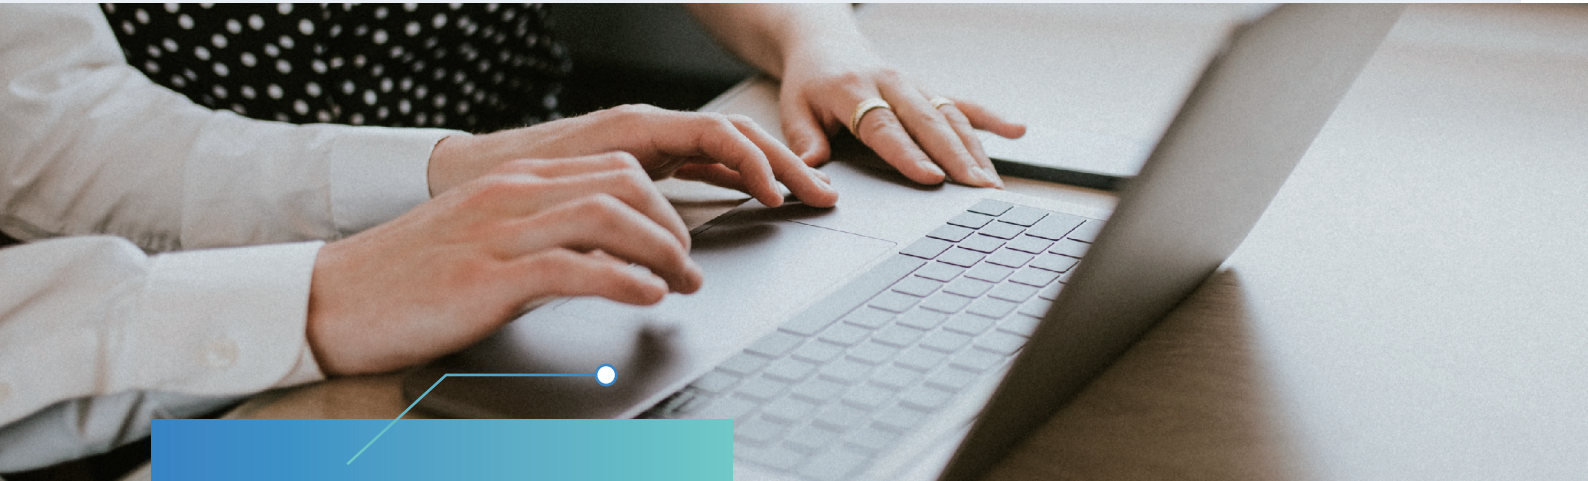

The VG-1's beautiful touch screen display catches the eye of passers with elegant depth and fidelity. You get full control over what you wish to display on the screen when the vending machine is not in use.

Contemporary Aesthetic

The clean lines and minimalist design will look attractive to customers and guests in any store, venue or location. Its simplicity lets it fit all interiors while offering enough visibility to stand out to customers.

Display Ads

The stunning touch screen display can display full screen ads when the machine is inactive and banner ads when active. These features allow you to get the most out of your vending machine at all times. VG-1 becomes an integrated part of your venue or store experience by advertising special offers, upcoming events, third party ads, etc.

Remote Management Features

The VG-1 can be managed remotely from anywhere in the world with just a web browser. The Remote Desktop can be accessed via both desktop/laptop and mobile/tablet.

The following features are available:

Stock management and low stock notifications

Enable us to keep the machines stocked to minimize any possible down time and in turn increase revenue. Make sure your customers always get what they are looking for thanks to smart inventory management.

Advertisements

Remote select screensavers to display ads or promotions when the machine is idle. This enables you to generate additional income from the machine. You are free to display any ads you want, regardless of whether they are related to e-cigarettes.

Remote Management Dashboard

Lets you manage and update ads and promotions from anywhere. All features that do not require physical interaction (like stocking the inventory) can be managed remotely via the Remote Management Dashboard.

Reports

Offer daily, weekly and monthly sales information helping you keep track of each machines performance. Easily identify your best sellers and track sales for each product. The reports make it easy to offer the products that are in demand.

Remote Service Desktop

The remote desktop functionality lets you quickly diagnose any possible faults from anywhere. When an error occur, you can immediately check if it can be solved remotely before having to access the machine in person.

Our Story

We believe the switch from smoking to vaping should be easier...

As more and more smokers want to quit smoking for vaping, they face a problem: While cigarettes are sold everywhere, e-cigarettes and vaporizers are confined to vape shops only...

To help make vaping the preferred choice, we needed to rethink access to e-cigarettes. People shouldn't have to go out of their way to get an alternative to smoking. So we designed a modern and easy-to-use vending machine exclusively for e-cigs.

"Vape & Go" vending machines makes it easy to find a trusted e-cigarette vendor around the clock. The contemporary design sets them apart from often dubious looking vape shops. With a bright touchscreen display, it's easy to select your preferred vape flavor.

Our goal is to make purchasing e-cigarettes simple, safe and convenient for all who wants to switch from smoking. We provide trusted locations for purchasing health and safety tested products.

Like vaping revolutionized the tobacco industry with a modern alternative, Vape & Go is now revolutionizing how they are sold. Join our vision of a world with less smoke and more steam with a modern e-cigarette vending machines.
